

## Hawai'i Clean Energy Initiative End Use Efficiency Working Group

### AGENDA

State Office Tower, Room 1403, 325 S. Hotel Street | Honolulu, HI  
Monday, December 5, 2011  
1:00 pm – 4:00pm

Call-in Number: (800) 944-8766 ; Participant Passcode: 75815

#### Welcome and Introductions

*Carilyn Shon (co-chair)*

A discussion on future activities for the EUEWG (The EUEWG has served, and will continue to serve, as a policy sounding board, give feedback, and make recommendations for policies.)

**Are there other activities that the EUEWG members feel are useful to show activities in support of HCEI?** For example, would members of the EUEWG be interested in developing fact sheets or data/information highlighting projects in your area? or areas that you are aware of? If so, what might these include? Data collection of what and what types and source? Case studies?

Let's discuss the EUEWG role and how the working group assists the implementation plan of the Roadmap. How can we improve the role to serve well and help drive the implementation such as activities, projects, policies, etc., toward our 30% goal, and how can we track and report results and success?

Should we change the membership of the EUEWG? If so, who/what members? (EUEWG recommendations are sent to the Steering Committee and the Management Group.)

- a. How does everyone feel about their roles and current membership?
- b. Are there any suggestions or nominations?
- c. Should we look at the structure of the membership and see if the members representing particular stakeholders are missing?
- d. Which representatives from stakeholders should we add or delete?

What would the EUEWG like to report back to the Steering Committee?
